

Gilden. 1629.

A new Almanacke and Prog-
nostication, for the yeere of
our Lord God,

1629.

Being the first after Bissextile
or Leape yeare.

Calculated and composed
according to Art, for the
Meridian and Latitude of
the Towne of Shipston
vpon Stowe, in the Countie
of Worcester.

And may well serue for all
the South parts of great
Britaine.

By G. Gilden φιλομαθης.

*Ludic in humanis Divina po-
tentia rebus.*

LONDON,

Printed for the Company of
Stationers.

1629.

Common Notes of
moueable Feasts,
according to the old
accompt vsed in
England.

Common notes of
moueable Feasts, ac-
cording to the new
accompt vsed be-
yond the Seas.

NOV 10 1967

To the Reader.

SEEING (Courteous Reader) that Prognostications and annuall Almanacks, are commonly published for the vse and behoofe of the Common People: I haue thought good for their better vnderstanding, to bee as plaine therein as I might: And therefore haue written little in this Almanack, and Astronomicall Table, but what (with small paynes, even of the simplest,) may be easily vnderstood. But seeing the predictions of the weathers dispose are commonly (by the Common sort) taxed of vntruth: I haue thought good, onely to set downe the Aspects of the Moone, and the rest of the Planetts, for the iudicious to find out of themselves, which being reduced into 12. Columnes, for the seuerall moneths, I haue sett them in my Prognostication, seeing the Table annexed is much pertinent thereunto: for the better vnderstanding whereof, and the like tables: If any Gent. bee desirous so to enrich his vnderstanding with Mathematicall knowledge, hee shall finde the works, both of ancient and moderne writers so plentifull, as that there were never better or nearer helpes, for the attaining thereof, then are at this present, as may well be prooved, by those excellent works and inventions, that haue lately berne published. Whereupon I conclude, that the attaining of these excellent arts, is now more easie, then any time in former ages. And so for this time I bid thee Farewell.

Thyne

A 2

G. Gilden.

Note also, that the Exchequer openeth
eight dayes before any Terme begin (ex
cept Trinity Terme) in which it openeth
but fower daies before.

A briefe Declaration, of the disposition of the foure Quarters of this yeare, 1629.

Of Winter.

WInter, the first Quarter Astronomically, began the last yeare, the 12 day of *December*, when the Arch-flame of light, being in his greatest digression from the Equator, to the South, and scited in the Tropicall point of *Capricorn*, bringing diuers impediments eident in nature, bereaueth our Septentrionall parts of the heate, and vigor, wherewith at other times (the Sunne being nearer, and more elevated,) doth preserve and cherish the Elements, and all things compassed

A Prognostication.

passed of them, whether vegetable, or
sensitive.

So as now cometh colde, and darknes
to vs on this Northerne part of the world:
But it brings the most pleasant, and com-
fortable time of Summer to the Inhabi-
tants neere to the South pole, viz. *Nova*
Gumea, Chasdi, Terra del Fuego, &c.

In this Brumall Quarter, it is good to
drinke little, and care well: because at this
time, mans stomack, being hot, is aptest
to digest.

The Diseases incident to this Quarter,
are pushes in the face, Leprosie, tooth ach,
red spots, feavers, and scabbs, the Fluxes
of blood in the inferiour parts, paine of
the eyes, Palsies, Gouts, and such like.

Of the Spring.

THe Spring (according to Astrono-
micall computation) beginneth when
the Sunne enters into the Dodecatemory
of *Aries*, or point of the Interfection of
the Ecliptick, and Equator, whereupon are
grownded the generall predictions of the
whole yeare succedent, as the radical or ge-
nethliacall

Olden. 1639.

aethiaccall revolution thereof happening this present yeare, the 11 of March, hauing then prouolved himselfe, to the punctuall interfection, of the *Vernall Equinox*: by which equall vicissitude of night and day, the world thereby, for thattime hath the fruition of his splendant rayes most gratefull to the dwellers within the temperate Zone, as *Europe* is: but over seruent and parching heate, to the inhabitants neere the Lyne, in the torrid Zone; as the most part of *Affrica*, and *East Indies*, with the *Spicery Isles*; and also to *New Spaine*.

This Quarter is the most comfortable of all the yeare, and of nature, warme and moyst: yet the ordinary diseases thereof, are Leprosies, Red spots, Tooth-ach, Beavers of blood, Pulses, or Wheales in the face, small Poxe, Ring-wormes, Falling sicknesse, Paynes in the throate, and neck, the Kings Evil, Wennes, and Griefes, in the shoulders and armes, caused by blood, sayntings and Phrensies.

Of Summer.

VV

Hereas the continuance of acti-

B 4

on,

A Prognostication

on, doth necessarily add power of operation, to all naturall Agents, and as it cometh to passe in Winter, that by reason of the Sunnes remote position, that his continuance above the *Horizon*, is shortest, and his absence under the same, longest, thereby causing the shortest dayes, and longest nights: So now in Summer, which quarter beginneth when fayre *Phœbus*, having arrived to the highest pitch of elevation in our *Horizon*, by his farthest obligation to the North; produceth the longest day and shortest night in the yeare: which will happen this yeare 1629. vpon the 12. day of *June*.

This quarter is hott and dry in nature, and doth so accordingly alter the humors in mans body.

The sicknelles agreeing to the nature hereof, are griefes and tormentes about the breast, ribbs, and spleene, Pusches, Leprosies, and diseases of the face, (as in the Spring,) bleared, and sore eyes, with other impediments therein; the Plurisie, heart and stomack aking, sorrow, vexations, Feavers of blood, Apostumes, Pestilence, the Iaundice, Payne in the belly, and secret parts, with other infirmities

Gilden. 1629.

infirmities proceeding of Melancholy.

Of Autumne.

THe Sunne hauing entred into *Libra*, which is the other dodecatemory, maketh equall Arches of Sun-shine, on the surface of this Globe of Mortality, producing a second Spring: which falleth out this yeare, on the 13. of *September*.

And this quarter is by nature cold and dry.

And the diseases thereof, are properly Paynes in the backe, Darknesse of sight, Retention of vrine, Fluxes of blood, Payns in the priuy parts, with infirmities in the face: also the Canker, Fistuloes, Emroids, the stone and Gravel, Feauers of blood, and impediments in the eyes.

Of the Eclipses.

FOrasmuch as there will happen no Eclipse, either of Sunne or Moone this yeare

A Prognostication.

yeare 1629. which will be visible in *Europe*: I should it needlesse to write any thing of them here in this place, but will proceed to the disposition of the Ayre.

The disposition of the Ayre in more particular.

FOrasmuch as I have noted the Aspects of the Moone and Planetts, amongst themselves, against every day of the moneth in these 12 Columnes following, I thought it would be no lesse convenient, then, if setting downe the daily dispose of weather, I shall by a Table immediatly following the said Columnes, shew, how by these Aspects, you may know the alteration of the weather: whereby you may conceive, that if by that Table alone, you may come neere to know the change of the weather: the whole art is not so vaine, as it is accounted; but awayleth much to the knowledge of truth.

A Prognostication.

*A Table to know when the
Moone will be South, for
every day in the yeare.*

*The use of this
Table.*

1	12	48	16
2	1	36	17
3	2	24	18
4	3	12	19
5	4	0	20
6	4	48	21
7	5	36	22
8	6	24	23
9	7	12	24
10	8	0	25
11	8	48	26
12	9	36	27
13	10	24	28
14	11	12	29
15	12	0	30

*From the Change From the Full to
to the Full the Day the Change, the
comes to the South after
Noone.*

THe age of
the Moore
being found by
the Kalender, (
that is to say) how
many days is past
from the time of
her Change.

Therewith en-
ter this Table, &
having found it
in the first Co-
lunne to the left
hand, if it be be-
fore the full
Moone; or to the
right hand, if it

be after the full Moone, you shall have in
the middle columnne, her comming to the
South, before or after, as is noted in the
foote of the Table. *As for example.*

The 19 day of January, the Moone is 5
dayes olde, wherewith entering the Table,
in the first Columnne to the left hand; I

find

Gilden. 1629.

find over against it 4 Howres, and o Min^a
shewing me, that her comming to the South
will be just at 4 a clocke in the afternoone.

*To know the Howre of the Night by
the Moone, on a Sunne-Dyall.*

THe time of the Moones comming to
the South, being found in the former
Table, in manner aforesaid; Looke in a Sun
Dyall, vpon what howre, before or after
12. on the Dyall the Moones shadow fal-
leth: for so many howres it is before or af-
ter the Moones comming to the South.

Example.

I Find the Moone South the aforesaid 19
day of Ianuary at just 4 a clock in the af-
ternoone: looking then on a Sunne Dy-
all, I find her shadow to fall the 3 howre af-
ter 12 on the Dyall: whereupon, I con-
clude, it is 7 a clocke at night; which is
3 howres after the Moones comming to
the South.

C

Astrono-

A Prognostication

Astronomicall Elections for Phylick and Chyrurgery, depending on the courle of the Moone.

When the body is filled with naughty and superfluous humors, it is convenient for thee to draw blood, so that the heavens consent thereto, and are agreed therewith: which being not circumspectly weighed, may be most dangerous to the patient, (whereof no understanding man is ignorant,) but when necessity brgeth.

As for the Pestilence, Plurisie, Phresie, &c. for then though the heavens deny yet a vein is speedily to be opened ad agri salutem.

This considered: Of Medecines some be purgative: some comfortive: and others in the meane betwixt both.

Medecines Purgative be either Solvendo or Leniendo: In the first the Moone must be in S. M. or X. for the other, the Moone must be taken when she worketh more in moistnes, then in drynes, being in a Δ . or \star . with ζ And you must take heed in the houre of giving the Medecine, least the Moone have any aspect with h . for he conjealeth the humours, and makes the medicine to worke but a little.

Likewise let her be free from any aspect with h for he is the giver of life, the helper and comforter of the Vertues, so that the Medecine can but weakly expell the humours, making the body affected with an evill quality.

Furthermore, in all Purgative medecines observe these ensuing rules: for in the administration

Gilden. 1629.

tion of Physicke, are chiefly to be respected three things: viz The Time: The Age of the Patient: And the manner of Administration,

For the time of the year.

For the election of time, consideration is to be had, that it be not in extremitie either of heat or cold. And therefore Hypocrates, Part 6. and 46. Aphorism, saith, that the Spring and Autumn, are best for Physicke, and Summer and Winter bad, and to be used but upon necessity. For in Summer, the humours boyle by reason of heat, causing great annoyance to mens bodies: yet if necessity urge to take Physick in Summer, it is best to take it by vomit, and in Winter (if necessity require) by purgation.

For the time of the Month.

Let not blood 3 dayes before or after the conjunction of the Moone with \hbar . The like of the conjunction of the Moone and δ . Neither let blood η and ν being in conjunction, whilst η is combust.

Let not blood the day before and after the full of the Moone. And the like observe, the Moone being in conjunction with \hbar . or δ .

But the Moone in any Aspect, with ν . or η , or in a Δ . with \odot . or δ . produceth a fitt time to lett blood in.

The Time of the day.

In the Morning fasting is best, or in the Evening after perfect digestion, with this proviso, that the Ayre be temperate, and the winde not in the South.

A Prognostication. For the Age.

C Concerning the Age, you are to vnderstand, that decrepit oldage, and young Infants, are vnfit to haue physick administred vnto them: or such as be vnder 14 yeares of age, and more then 56 yeares old: or such as be exceeding fatt or very leane: and it is also dangerous, for a young man to take much physick. For as a learned Physitian saith: He that taketh much Physick, when he is young, will much repent it when he is olde.

For the Age to lett blood.

In Youth. from the change to the first quarter
In Middle age. from the first quar. to the full.
In Elder age. from the full to the last quarter.
In Old age. from the last quarter to the change
And after bleeding, vse not any violent exercise, no sleeping, no venery, no guttoney.

The manner of Administration.

For the manner of Physicks administration Albumazars opinion is; That the fittest times for Purgations are to be elected, according to the motions of the Moone, in watery signes as ♉. ♊. and ♋.

Others hold opinion, that the first halfe of ♊. and ♋. are fitt times. And when the Moone is vnder of course, it is indifferent to take purgatiue medecines.

Gilden. 1629.

D in S, in { ♀ } not combust is good } with C=
 * or Δ af- { ♂ } to auoid Choller } lectua
 pet of { ○ } is good to purge } ries.
 { ♄ } good to expell Me-
 { } (lanchole)

D in m, in { ♀ } good Choller } with
 * or Δ af- { ♂ } to } Phleame } Actions.
 pet of { ♄ } purge } Melancholy

D in X, in { ♀ } good Choller } with
 * or Δ af- { ♂ } to } Phleame } Pills.
 pet of { ♄ } purge } Melancholy

D in ♀, in { ♀ } good Choller } with any
 ~ in *, or { ♂ } to } Phleame } kind of
 Δ with { ♄ } purge } Melancholy } medecine.

But note, that you must looke that ♀ be not combust, and that the S, □, or 8 of ♄ or ♀ either to the Moone, or between themselves, doe not hinder the operation of the Phisick.

Neither let the Moone be in any of the signes, that do chete the cabb; V, 8, m. For then the medecine will stay but a little with the patient, causing him to vomit, vntles you meane to purge by vomiting.

Also in purging the Melancholly, let not ♄ haue dominion; nor ♄ in purging the sanguine, or the liuer, nor ♄ the Chollerick, nor ♄ the head, nor ♄ in purging the lungs.

The Moone being fortified, it is ill to purge the brain.

A Prognostication.

In the administration of purgations, remember Haly his Commentarie vpon Ptolomy, who saith: That the humours, from the Change of the Moon to the first quarter, and from the full to the last quarter, do moue, from the inward parts of the body, to the outward. And likewise, from the first quarter to the Opposition: and also, from the last quarter to the Change, they moue from the outward parts to the inward.

Therefore, in the first, and third weeks of the Moon, it is best to apply externall euacuations: & in the second and fourth weeks, internall purgations.

How the Vertues be corroborated.

The Vertues, be either Vitall, Animall, or Naturall.

The Vitall Vertues remain in the Heart: The Animall in the Brain: the Naturall in Liver.

The Vitall Vertues are governed of ☉ & ♃.

The Animall of ♀ and ♂.

The Naturall of ♃ and ♀.

Other vertues be also governed by the Planets, as the vertue attractiue is governed of ☉. The digestiue of ♃. The retentiue of ♄. The expulsiue of ♀.

Also the signes thus gouerne the Vertues ♃, and ♄, rule the attractiue: ♄ and ♄ the digestiue: ♄ and ♄ the retentiue: ♄ and ♄ the expulsiue.

Also the Vertues be ruled by the Planets thus: ☉ the well-spring of the Vertues vitall: ♄ of the Vertues animall: ♄ of the receptiue: ♃ of the augmentatiue: ♄ of the attractiue: ♀ of the appetitiue: and ♀ of the imaginatiue.

And therefore, when you would fortifie any of these

Gilden. 1629.

these Vertues, fortifie the Planet signifying the same, and it is done.

In letting of blood, you must know what persons are fit to bleed, and what not. And if they be fit, how it is with the patient inwardly, for his complexion and age: and outwardly, for the time of the yeare, and of the month, as is aforesaid.

For the Completion.

For the flegmatick, let the D be in V or 7, when you draw blood: for the Melancholy in 2 or 3: for the Chollerick in 5 or 8: and the sanguine in any of the aforesaid.

The vnaccustomed are not to be phlebotomized, least it breed some malady, vnllesse necessity vrge it. And you must haue respect to the strength of the person.

Certaine Elections concerning Husbandry.

It is best to plant in the last quarter of the D, so that he be not aspected by 6 or 8, or 10 or 12.

Sow Corne, when the D is in 5.

Fell Timber for building, from Midsummer to Christmas, in the wane of the D.

Build, or lbb Carrell, when the D is in V, 7, or 11.

Remoue Trees, the last quarter of the D, betweene 11 halloonyde, and Twelue-tyde.

FINIS.
